

Kontakt/HALion/EXS24

1. Move all samples in the “16 bit” or “24 bit” folder to the folder “Samples” in your TBO folder“ thus replacing the old files
2. Done!

Gigastudio

1. Open the Instrument Editor
2. Open TBO.gig (BIG file, takes a while...)
3. Right-click on one of the folders in the sample window and choose “Replace all samples in all folders”
4. Locate and choose the “24 bit” folder as “Root directory”
5. Check “Match samples by name to wav/dxl files anywhere under the root directory
6. Click on “Replace”
7. After a couple of minutes you should get the result “replaced 93 of 4495 samples”
8. Save your TBO.gig file
9. Done!
